EXPERIENCE

ReverbNation, Senior Design Manager & Lead Designer

2013 — Present

Lead a team of designers in an agile SAAS company. Spearhead a standardized design language, an OOCSS methodology and an approach to design focused on concise and intuitive user interfaces. Create or lead designs for products on varying platforms, including web, iOS and Android utilizing research based processes. Lead design reviews and provide appropriate feedback. Collaborate with developers in varying capacities including as front-end resource.

Chapelboro, Designer & Front-End Developer

2012 — 2013

Managed daily operations of a hyper-local news portal for the Chapel Hill and Carrboro areas. Managed the full redesign of the site and migration to a new responsive platform, as well as the creation of a companion iOS application.

Joel Pagan Designs, UX/UI Consultant

2004 — Present

Regularly consult on a huge variety of projects ranging from traditional graphics work, website and product designs, and varying front-end development projects.

Fusion Studios, Co-Owner & Lead Designer

2005 — 2010

Full service design and development studio focused primarily on small business solutions. My responsibilities included managing clients, full cycle designs, front-end development and leadership to the rest of the design and development teams.
